

AIA CEU PRESENTATION:

DESIGNING WITH WOOD FIBER ACOUSTICAL PANELS

Credits: 1 Learning Unit; Credit Designation HSW/LU

Cardinal Acoustics is a certified provider of AIA programs and we have the added expertise to educate on the topic of acoustical panels.

In our AIA-approved lunch & learn, one of our certified reps will discuss acoustics, including definitions and how to address reverberation and sound control in building design. We discuss the history of wood fiber, product manufacturing, and the properties that make wood fiber panels superior to other types of acoustical panels. We also include guidelines for the safe and effective installation, handling and painting of wood fiber acoustical panels.

Learning objectives include:

Wood Fiber Panels

- Features and benefits
- Applications

Designing with Wood Fiber

- Installation guidelines and details

Interior Acoustics

- How to solve difficult reverberant spaces by employing wood fiber panels

Arrange for a Presentation:

If you're interested in getting HSW certified learning units or offering a lunch and learn at your firm, call us at 212-651-9282 or email us at david@ad-elements.com and we'll schedule your HSW lunch & learn.

If your office is open we will provide the lunch as well as the presentation.
